„Punkte"

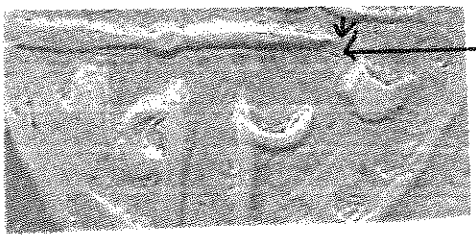

Rolf Ehlert (RJE) hat in seinem Handbuch die offensichtlich „immer wiederkehrenden" Punkte (Anzahl und Stellung) ausführlich und verständlich beschrieben. Er hat daraus verschiedene Handbuchnummern festgelegt.
Auf den Abbildungen in dieser Ausarbeitung habe ich sowohl „diese im Handbuch beschriebenen" Punkte markiert aber auch alle anderen Merkmale, Schatten, Zufälligkeiten oder auch gewollte Beizeichen.
Was nun an Punkten und all den anderen markierten (oder auch von mir noch übersehenden) „stellen" gewollt sein mag, kann jeder, der möchte selbst auswerten.
Eine kleine Aufstellung der „offiziellen" Beizeichen findet sich in der Ausarbeitung der Akse (und Dirhem) von Murad I.
Vielleicht findet jeman sogar neue, noch nicht veröffentlichte Typen.

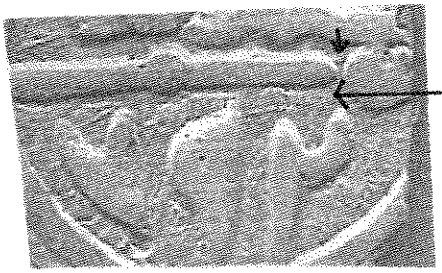

„Getrennt"

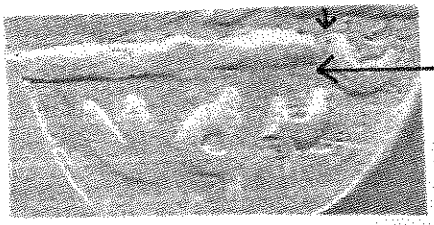

Abbildungen:

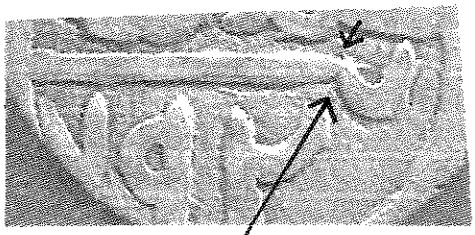

105 - 106
109 - 110
121 - 122
137 - 138
